

Stay One Step Ahead

As an operations leader, you need visibility into how the company works so that you can nimbly adjust to real-time information. Yet, it's not realistic to be able to be in multiple places at the same time, overseeing departmental effectiveness at a detailed level every day.

PayNorthwest provides an integrated software platform that gives you the visibility you need, consolidates systems and databases, and reduces duplicative manual work. We make it possible to spend your time on forward-facing solutions for the whole enterprise rather than chasing down answers to questions one department or location at a time.

What Operations Gains

Better cross-functional visibility

Reduced cost & increased compliance

Unified info & increased efficiency

Transparency across departments

Flexibility as needs change

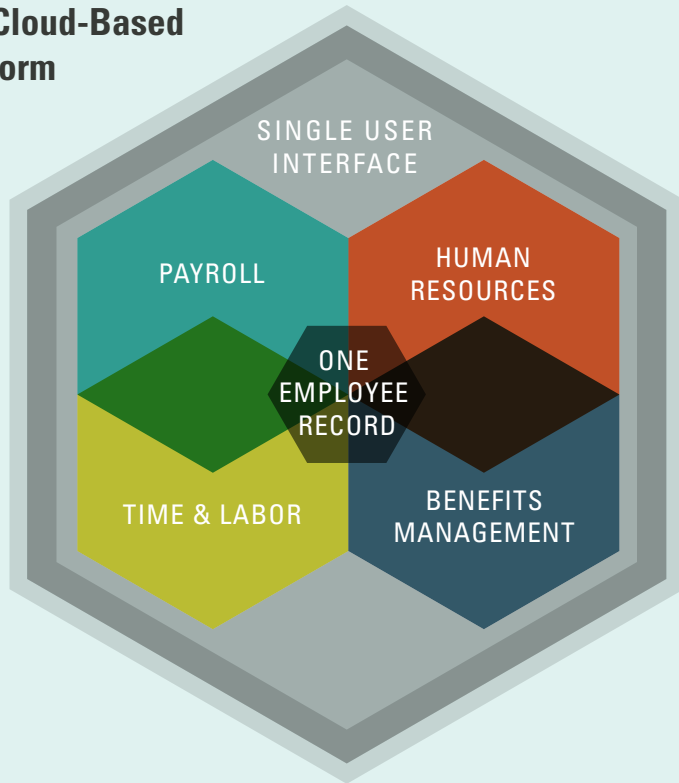

OPERATIONS

Unity Streamlines Everything

Our Cloud-Based Platform

Integration of manager self-service tools and workforce dashboards results in nearly 2.5 times greater improvement in staff productivity, **180% greater improvement in revenue per employee**, and **125% greater reduction in overtime costs**.

— Aberdeen Group 2015, The Future of Core HR: Building the Business Case for Automation and Integration

Key System Features

- Multiple labor-data-capture device options
- Real-time reporting and notifications
- Single database across all departments and locations
- Cloud platform with light IT footprint
- Data exchange capabilities with ERP and other systems
- Scalable for rapid deployment of new operations
- Constraint-based labor scheduling
- Complex labor allocation among cost centers

Better Outcomes

- Enhanced visibility of operations across the organization
- System and process improvements
- Solution adoption within reasonable parameters and time frames
- Cost-effective solution scaled to current operations
- Ability to link labor data with other core systems
- Better labor resource planning
- Empowered managers with information to make better decisions
